

# Automatic Bagging Machine

## BY-BAG-1000

The BY-BAG-1000 bagging machine is designed and patented by BY to bag & seal the big barrel (5 gallon and so on) automatically. Entire roll film encapsulation, effectively keep the external cleaning and not being damaged.

The automatic operation with high success rate of film sealing, firm structure, stable performance, simple operation and easy maintenance make BY-BAG-1000 the perfect solution for water plants.

### Main Technical Data:

- ☒ Type No.: BY-BAG-1000
- ☒ Capacity: 2000 BPH
- ☒ Voltage: 380~440Vac
- ☒ Power: 4 kW
- ☒ Dimensions: 2680\* 950\* 1600mm
- ☒ Conveyor belt level: 550mm from ground level.

Machine videos are available for viewing at:  
<https://www.BYequipment.com/products.html>

**Application:** 5 gallon barrel or customized barrel (uniform specifications are required).

### Applicable film specifications:

- ☒ Membrane material: PO (Propylene Oxide)
- ☒ Double side opening of ring film;
- ☒ The whole roll film length is 700-720mm
- ☒ Single layer thickness of film 0.006-0.015mm;
- ☒ The maximum diameter of the whole roll film: Ø 350 mm, no static (refer to electrostatic agent 3%) wrapped tight, winding barrel diameter greater than Ø 80 mm.
