

Automatic Decapper Machine

BY-DCA-1500

The BY-DCA-1500 Automatic Decapper machine is designed and developed by BY to remove and discards caps from empty big barrel.

The specific design of the machine leads to a reduction in production time and manpower and ultimately leads to a significant cost reduction.

This machine is equipped with PLC to provide high speed, accurate positioning, highly automatic with long service time machine. This machine with smart system has adjustable "decapping time" that it's adjustable by the adjust pulling strength or changing the "blowing time". decapping and blowing time ranges are 0~10 seconds with 0.1S accuracy; With this smart system also could do operation examination, easy to check daily production capacity.
